

My design process

Step 1:

- Think about my domains
- Look at work that inspires me
- Think about things that are important to me
- Go to museums, parks, movies, and walk around the city

Step 3:

- Find similar projects that might apply to mine
- Do lots of research
- Sketch out my ideas
- Come up with questions

Step 5:

- Learn any skills in order to make a prototype
- Build a low fidelity prototype
- User testing
- Define questions
- Get feedback
- Build better prototypes
- Write a paper and come up with a conclusion

Step 2:

- Write down keywords that come to me
- Come up with several concepts that I feel passionate about and would want to research more
- Write down skills that I have and write down possible areas that I need to study to obtain a certain skill that I would need
- Discuss my ideas with others

Step 4:

- Find similar projects that might apply to mine
- Do lots of research
- Sketch out my ideas
- Come up with questions
